ARE SKILLS AND COMPETENCES THE NEW KNOWLEDGE?

Viesturs Lieģis, Amrop
Latvia

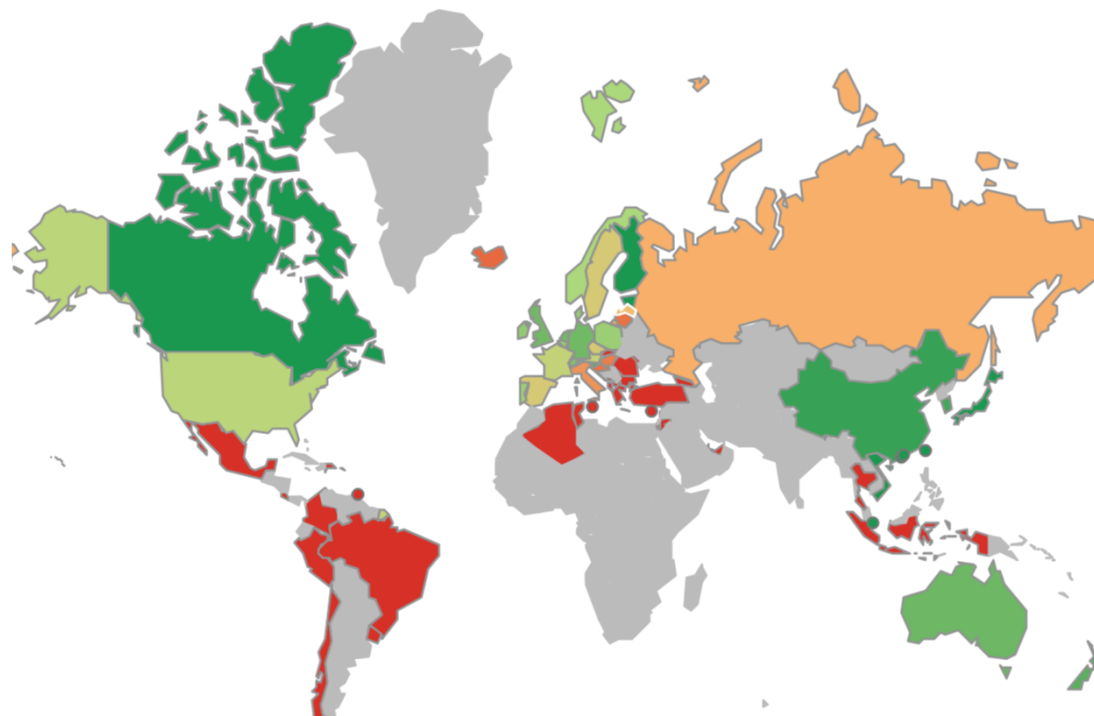

By the time they leave education, as many as two-thirds of children entering primary school today will not have the skills required to get a job

STEM IS TODAY

MULTIFACETED TALENTS

We have to teach our kids to be very, very innovative, very creative. In this way, we can create jobs for our own kids

The new technology will destroy a lot of jobs, but it will also create a lot of jobs

Computers will never have mastery over "wisdom" or "love," giving human a perpetual advantage
